

30th September 2011

To Whom it may concern:

We are pleased to recommend Coodayssy Ltd as a trusted and quality Civils Contractor.

Coodayssy has worked closely with us since 2005 and has helped us construct five waste management facilities, 2 in the north-east and 3 in the south.

Coodayssy has assisted us in the design and development of our schemes as well as carrying out the civils works on them.

We have appointed Coodayssy early on in the projects on a fee basis to value engineer each scheme prior to construction. This has benefitted us in a number of ways. Each project was designed specifically for our operating needs. The most cost effective solutions were adopted reducing the capital cost to a minimum. And because Coodayssy was involved from the outset, there were no variations during the construction stage as the brief was clearly understood. This allowed each project to run smoothly and be completed on time and within budget.

During construction Coodayssy paid close attention to its work and that of its sub-contractors, carrying out weekly inspections, which in turn reduced the snagging list at practical completion.

We would without hesitation recommend Coodayssy Ltd as a design and build contractor and look forward to developing future schemes with them.
